EDUCATION

University of Central Florida — Aug 2021 to May 2026
B.S. in Information Technology — Orlando, FL
Dean's List (2023–2024) • GPA: 3.7

EXPERIENCE

Founder & Technical Product Lead — Jan 2026 to Present
Clozi LLC (AI Fashion Startup) — Orlando, FL

- Established DevSecOps CI/CD pipeline with automated checks for secrets, unsafe migrations, and type violations gating every production release
- Enforced product quality gates requiring 80% line/function/statement and 70% branch test coverage before deployment
- Designed and maintained 48-table SQL database with 166 row-level security policies ensuring data integrity and access control across all environments
- Created and executed Playwright E2E regression test suites to validate integration flows and support quality-gated delivery
- Authored technical documentation covering system architecture, database migration procedures, and security policies

Project Manager (Part-Time) — Apr 2025 to Present
Risker (Insurance Technology Startup) — Orlando, FL

- Led cross-functional agile development across engineering, product, and operations stakeholders for an AI carrier-matching system
- Designed technical specifications and confidence scoring framework supporting integration across 45 carriers
- Reduced agent research time by 40–60% through pre-qualification scripting and guided routing workflows
- Improved pre-quote efficiency by 25%+ by analyzing requirements and implementing structured filtering and deployment logic
- Validated billing and subscription flows through systematic testing and documentation prior to production release

Event Manager — Nov 2022 to Present
UCF Student Union — Orlando, FL

- Managed daily operations for 2+ events across 6+ venues with crews of 15+ staff members
- Produced systematic pre-event documentation and shift briefings, maintaining 100% on-time execution

PROJECTS

EduWealth — React Native, TypeScript, Supabase, Plaid, Gemini/OpenAI — Jan 2026

- Built student-focused fintech app with budgeting, transactions, and AI advisor workflows
- Designed 13-table SQL schema with 48 RLS policies and audit-event tracking for compliance and data integrity
- Implemented secure Plaid account-link and sync pipelines via Supabase Edge Functions

Multi-Threaded Package Router — Java — Jun 2025

- Built multi-threaded simulation of a package routing system with synchronized resource access and deadlock avoidance
- Applied systems-level concurrency control in a complex, state-dependent environment

SKILLS

- Systems & OS: Windows 10/11, Linux, system troubleshooting, application deployment and integration
- DevSecOps & Testing: CI/CD pipelines, automated quality gates, Playwright E2E testing, test case creation and execution, release documentation
- Backend & Data: SQL, PostgreSQL, Supabase, REST APIs, Stripe, Plaid
- Languages: Java, TypeScript, JavaScript, Python, C, SQL
- Frontend: React Native, React.js, Expo, Tailwind CSS
- Tools: Git, GitHub, Figma, Firebase

ACTIVITIES & HONORS

AI@UCF • HACK@UCF • National Society of Collegiate Scholars • Dean's List 2023–2024
